PROFILE

Commercial growth professional with a track record of driving revenue, building partnerships and supporting market expansion across FMCG, professional beauty, fintech and digital businesses. I work between commercial, growth and business development functions — identifying where revenue is being left on the table, building the relationships needed to capture it, and putting the execution in place to deliver results.

My experience spans regulated trading platforms, enterprise technology and consumer brands, where I have grown customer accounts, improved onboarding and activation, and supported partner and stakeholder relationships across multiple markets. I am comfortable working directly with founders and leadership teams, and equally comfortable in structured commercial environments.
